

Wing Vestibule Assembly Instructions

Models 0601, 0604

In order to properly install the wing vestibule you must first insure that your Flex-bow tent has the required grommets on the end of the awning flap. You will need five grommets as illustrated in figure 1 below. The grommets are represented by the black circles and numbered 1-5. Depending on when your tent was made, and the specific model, you may be required to add two or three additional grommets. If you do not have the required grommets you can have them installed at a local canvas shop. It should be relatively easy and inexpensive to do. Affordable grommet kits can also be found at a local hardware store such as Home Depot or Lowe's.

Grommets 3 and 4 should be placed 4 inches from the front edge of the awning as show below. Grommet 5 should be in the center of the awning on the same horizontal plane as grommets 1 and 2.

Figure 1

Assembly

- 1) Assemble the tent first. Tie the end of a guy rope onto each of the grommet holes 1, 2, and 5 (as numbered in figure 1). Note that two guy ropes are included with the tent. An additional guy rope is included with this wing vestibule accessory.
- 2) Join the awning ridge pole. Loosen the thumbscrew and lengthen the pole to the width of the awning. Place the awning ridge pole across the awning uprights (included with the tent). The posts at the top of the awning upright poles will go through the holes at the ends of the awning ridge pole. Face the thumbscrew down.
- 3) Insert the posts on the awning upright poles through their respective grommets in the top of the wing vestibule.
- 4) Now insert the posts on the awning upright poles through grommets 3 and 4 of the tent awning flap.
- 5) Expand the awning ridge pole until it is taut and tighten the thumbscrew finger tight.

- 6) Position the wing vestibule so the bottom edge is flush to the ground and taut. Secure with stakes.
- 7) Secure the guy ropes with stakes. Adjust so they are taut.
- 8) Secure the top of the wing vestibule to the awning ridge pole with the Velcro-like strips.
